

Yellowknife Sani Sport

OUR MISSION:

To aid in creating and maintaining a healthy environment for our clients, while lowering the risk of Staphylococcus bacteria from spreading through our sports communities.

The Problem: Damp, sweaty sports equipment that is worn often, stored in a somewhat airtight bag and sometimes cleaned but very seldom sanitized or deodorized.

The Danger: Bacteria thrive in this dark, damp environment. These bacteria can be dangerous when they contact an athlete's skin. Many NHL, NFL, College, High School and younger athletes have succumbed to bacterial infections contracted from their equipment.

The Solution: Canadian university researchers developed the Sani Sport equipment sanitizing system. The system was designed to destroy bacteria and eliminate odor.

The Process: The patented process converts Oxygen into Ozone. The Ozone is circulated throughout the equipment, killing the bacteria. A patented Ecomist solution, containing natural Tea Tree Oil, is then fogged into the equipment to attack the remaining bacteria. The final step is to seal the process with a scented bactericide creating a protective shield on the equipment.

The Facts: This is not another fragrance or scented cover-up. It is a scientific, biological process designed to eliminate bacteria and the resulting odors. The equipment has a scent that is slightly medicinal, but not unpleasant. Equipment is ready for immediate use. The process can extend the life of the equipment as well.

WHAT WE SANITIZE AND DEODERIZE

Ask a sports parent what the most offensive smell is, and they'll quickly respond: "my kid's sports equipment". Our unique process, however, is not just limited to sports equipment. We can sanitize and deodorize just about anything. Below is a list (but not limited to) of what we can service. For more details or questions about items not listed, please contact us to inquire.

- Hockey Equipment
- Speed Skating Equipment
- Referee Gear
- Helmets / Mitts / Gloves
- Shoes / Skates / Boots
- Broomball Equipment
- Motocross Gear
- Military/Police Gear
- Bullet Proof Vest
- Fire Gear
- Equestrian Gear
- Back, Leg, and Knee Braces
- Prosthetics
- Snowmobile Suits / Helmets / Boots
- Household items:
 - Cushions / Luggage / Backpacks / Pillows / Costumes / Sleeping Bags
- Wet suits / Life Jackets

We can sanitize and deodorize basically anything that will fit in our machine. (Does not remove stains)

Professional Hockey Players are no strangers to the damage infections can do:

The bacteria and germs found on hockey equipment can be very serious and potentially fatal. Over the years, hockey players of all ages have been hospitalized for infections caused by the bacteria and germs that were on their hockey equipment.

NHL players including Mikael Renberg, Joe Thornton, Ed Belfour, and Darren McCarty have sustained injuries and missed games because of infections. Renberg's case was an extremely serious infection to his hand. Reneberg's hand became so infected that his hand swelled up and was compared to a boxing glove. When discussing the situation, Reneberg's doctors considered AMPUTATION or possibly DEATH as a result of this infection! Joe Thornton ended up missing nearly two weeks of a season due to an infection on his arm. He spent 6 days in the hospital and had to have surgery to have the infected area cleaned. Ed Belfour had to miss 4 games one season due to infection on his hand. Darren McCarty spent 2 to 3 weeks on the injured reserve due to an infection on his arm.

Don't let this happen to you!

It is recommended equipment be cleaned 1-2 times per season. More often if you play 3 or more times per week.

For best possible results, your equipment should be thoroughly dried prior to treatment.

Please read the treatment instructions sheet before bringing over your gear.

The patented Sani Sport technology has been scientifically proven to eliminate between 99 and 100% of the dangerous bacteria that can be found in protective equipment. This includes MRSA, general staph infections, E Coli, and a variety of influenza organisms.

Machine is Mobile. We can come to you for large jobs.

Pricing (subject to change)

Initiation/Novice hockey gear	\$15.00
Atom/Peewee hockey gear	\$20.00
Bantam/Midget hockey gear	\$25.00
